

More Flexibility, increased efficiency and a lower TCO!

NETGEAR
BUSINESS

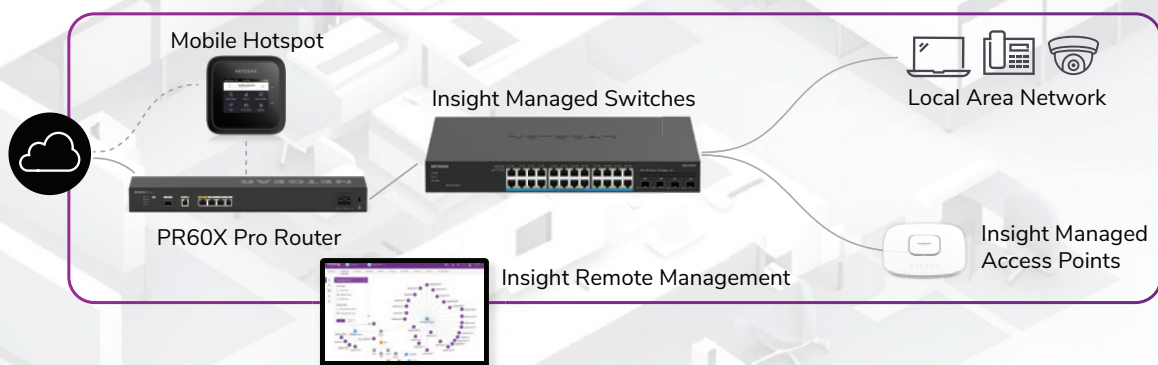

**TOTAL NETWORK
SOLUTION**

The NETGEAR Total Network Solution helps you to get the most out of your network. Easily deploy, manage, and monitor every aspect of your customers' networks from a single pane of glass. No more driving up to your customers to reboot their access points, switches, and/or routers.

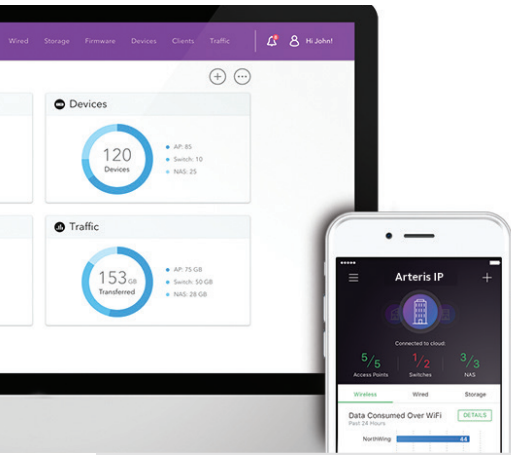

The Total Network Solution (TNS) combines the NETGEAR Insight management platform with NETGEARs Pro Router, Smart switches, Pro WiFi Access Points, and even Mobile Hotspots to enable you to remotely manage the networks of your customers.

**TOTAL
NETWORK
SOLUTION**

The Total Network Solution provides you:

- **ONE Single solution for your total network**
Smart switches, wireless APs, pro routers and mobile hotspots
 - **ONE Single point of contact for sales**
Approachable contacts and a faster time to market
 - **ONE Single point for support**
No finger-pointing, NETGEAR will solve your problem
 - **ONE Single manufacturer**
Guaranteed interoperability, easier expansion
 - **ONE Single pane of glass**
Faster setup, one UI
- As a result, you and your customers will be **more flexible**, **increase efficiency**, and **lower the TCO** of the network.

NETGEAR Insight

NETGEAR Insight helps you to manage every aspect of the network in one place. No need to log into multiple management environments. To save time and reduce errors, the multi-tenant cloud management platform lets your support team change customer environments with a click of a button in a simple-to-use interface. You can use the Insight app on your phone or log in to Insight from any computer to have powerful control over entire networks anytime, anywhere.

The **NETGEAR PR60X Pro Router** is a strong professional router combining multi-gig capabilities and a flexible SFP+ port with dual WAN failover protection. The PR60X provides affordable uninterrupted connectivity 24/7.

NETGEAR's line of **Smart Cloud Managed Switches** provides powerful features as the latest Multi-Gig and PoE functionality. They're the ideal solution for even the most advanced small and medium organizations looking for the best combination of performance and value.

The **NETGEAR Pro WiFi Access Points** will upgrade your wireless network with faster speed, more connections, less interference, and more capacity to support high-bandwidth WiFi applications in high-density environments. They come with simplified enterprise-grade security included.

For on-the-go connectivity and as backup, you can count on the ultra-fast **Nighthawk LTE Mobile Hotspots**. No need to use potentially unsecured public WiFi. Connect to the internet at Gigabit speed wherever you go, with enough speed and capacity to share with 32 devices. Your data and devices will be safe.

All the Total Network Solution (TNS) devices have guaranteed interoperability and make network expansion effortless. You can [click here](#) to see which devices are part of the Total Network Solution.

Next to the best cloud management software platform and the best hardware, NETGEAR offers the best **Support** in the market. Our hardware has the best warranties you'll find with next-business-day replacement and 24/7 support from our highly trained experts on selected products. NETGEAR even supports partners with presales support from our design teams. **For Free!!!**
